INSTALLATION INSTRUCTIONS

PART NUMBER: WR309

WORX DOMINATOR RIDE PLATE POLARIS OCTANE

IMPORTANT : READ ALL INSTRUCTIONS BEFORE PROCEEDING WITH INSTALLATION

Tools necessary for installation :
5mm Allen Key
1 x Tube of silicone

Parts Supplied: 1 x **WORX** Ride Plate

Fitting: Because the Octane boats are made individually in several different moulds there are minor differences in the position of the ride plate mounting holes. You may have to make some minor adjustments to the ride plate hole positions to make it fit your particular boat, we apologise for the inconvenience but it is something that is beyond our control

1. Roll Ski onto side (refer to manufacturers instructions)
Remove stock ride plate and wipe clean any old silicone from the hull and threaded inserts
2. Fill threaded inserts with silicone and apply a small amount of silicone to the mounting surfaces and around edges of your new **Worx** ride plate
3. Fit the **Worx** ride plate into position using the stock bolts and tighten.
4. Apply a bead of silicone around all edges of the ride plate and smooth off before it cures.
5. Wipe off excess silicone with a damp cloth. Allow 6-0 hours for the silicone to cure before riding
- 6 Regularly check that all bolts are tight

Thank you for purchasing **Worx Racing Components** products. We believe that **Worx Racing Components** products are among the finest watercraft parts available.

A great deal of time and effort has gone into the design and development of this product to ensure that it will perform to the highest standard and that installation will be a relatively straight forward procedure. If you have any comments on the performance/or installation of our parts, please contact us on the numbers listed on page one or through your local dealer.

Note: Please check with your governing body for eligibility for your class of racing
